**Edge Sander** 

Electricity is dangerous and must always be used with great 1. care

0411 Safety Guidance

- This edge sander is designed to sand areas of floor not accessible to a larger floor sander. You must use the appropriate sanding disc. It is not designed for any other nurnose
- З. The action of this edge sander can cause injury or damage if the
- machine is not used in a careful and controlled way. 4 If you have not used an edge sander before, familiarise yourself with the machine on some
- straightforward work before you start on the main task
- Plan your work and think ahead to make sure you will always be working safely.
- You must have at least the following items of personal protective equipment: goggles: 6 EN166 or BS2092: dust mask - a minimum of EN149 FFP3(s) protection: Safety boots to EN345 or BS1870/4972; industrial quality gloves; residual-current device (RCD) if using a 230 volt (mains) supply
- 7.
  - A personal first-aid kit should be available.
- 8 This edge sander must not be used by minors, or by anyone under the influence of drugs
- 9 This edge sander is designed for operation by an able bodied adult. Anyone with either temporary or permanent disability must seek expert advice before using it.
- Although edge sanders are designed for one person operation you should always be

still, it may cause grooves in the floor.

machine and may cause grooves in the floor.

- 9.
- 10 Watch out for signs that vibration may be affecting your hands. If your fingers start to tingle or feel numb, take a short break from using the machine. Exercise your fingers to encourage blood circulation. Ask the hire company for a copy of the HAE leaflet no. 2150 - Hand-arm vibration or visit www.hse.gov.uk/vibration

For guidance on managing

construction health risks go to

www.hse.gov.uk/construction

Using the Edge Sander

Let the edge sander run up to full speed before lowering it carefully onto the surface. Be prepared for the reactive force when the sanding disc contacts the edge surface.

Keep the edge sander moving across the floor all the time it is running, do not let it remain

Apply only moderate pressure to the machine. Any extra pressure will overload the

Keep the sander clear of central heating and other pipes at floor level - it can damage them.

Wear your protective equipment including ear defenders, dust mask and goggles.

PSM Plant & Tool H

- To help prevent vibration affecting your hands, operate the machine for shorter periods. Keep your hands warm - wearing gloves may help do this.
- 12. Tilt the edge sander off the floor surface before switching off and wait for the disc to stop
- completely before you put the machine down. 13. Make sure that any ventilation slots in the edge sander do not get blocked with sawdust.
- 14. Remember to empty the dust bag when it is half full or when you stop work: but do not
- empty the sawdust onto a fire.
- Switch off and remove the plug from the socket before leaving the edge sander 15. unattended
- If your equipment does not work properly do not attempt to repair it. Contact the hire 16. company.
- You may want to read this leaflet again. Please keep it until you finish work. 17.
