

Using the Turf Lifter

- Wear your protective equipment including ear defenders and boots.
- Lift the blade clear before moving the turf lifter over paths and borders.
- Hold the turf lifter handle firmly with both hands while working.
- Do not lower, or activate the blade on any hard surface. The blade will be damaged and injury could occur.
- The engine must be running fast enough to activate the blade before you lower it into the ground.
- If cutting on a slope do not work up and down the slope. Start at the top and work across the slope. Do not attempt to cut on steep gradients.
- Make sure you are cutting deep enough to remove the complete root system if you are going to re-lay the grass you have just cut.
- Walk over the cut grass carefully while working to avoid damaging it.
- While cutting, keep a lookout for any stones or other objects in your path. Stop the turf lifter and clear them out of the way.
- Before attempting to remove wire tangled round the blade or grass binding a wheel or any similar fault, stop the engine by closing the throttle and switching the ON/OFF switch to OFF, then remove the spark plug lead from the spark plug to prevent the engine from starting until you have rectified the fault.
- If cutting more than one strip of grass, leave the strip just cut in place until you cut the adjacent strip. This allows the machine to operate on the level rather than one side being lower where the grass has been removed.
- If the strip of turf is too long and too heavy to handle use a border spade or other edging tool to cut the turf into manageable sections.
- The turf lifter can be steered to cut round gentle curves if the layout of the lawn so required.
- When you reach the end of a cut maintain the engine speed while you lift the blade up clear of the grass.
- Slow the engine to a tick-over and prepare for the next cut or stop the engine and roll up the strip of grass.
- While working with the turf lifter, take care not to lose your footing on what maybe uneven ground.
- Stop the engine before leaving the machine unattended.
- Clean the machine at the end of each day and before you return it to the hire company.
- If your equipment does not work properly, do not attempt to repair it. Contact the hire company.
- You may want to read this leaflet again. Please keep it until you finish work.

Please keep this leaflet safely as it may be required for future reference

STOPPING THE ENGINE

1. Turn the fuel tap off.
2. Close the throttle.
3. Switch the ignition switch to OFF.

4. Stop the engine and let it cool down.
5. No smoking.

6. As soon as the machine warms up, gently open the choke, before starting work.

7. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

8. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

9. Guide the cord back into place so that it fits correctly.

10. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

11. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

12. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

13. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

14. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

15. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

16. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

17. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

18. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

19. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

20. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

21. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

22. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

23. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

24. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

25. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

26. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

27. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

28. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

29. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

30. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

31. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

32. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

33. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

34. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

35. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

36. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

37. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

38. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

39. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

40. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

41. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

42. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

43. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

44. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

45. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

46. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

47. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

48. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

49. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

50. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

51. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

52. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

53. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

54. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

55. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

56. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

57. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

58. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

59. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

60. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

61. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

62. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

63. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

64. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

65. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

66. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

67. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

68. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

69. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

70. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

71. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

72. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

73. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

74. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

75. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

76. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

77. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

78. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

79. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

80. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

81. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

82. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

83. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

84. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

85. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

86. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

87. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

88. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

89. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

90. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

91. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

92. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

93. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

94. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

95. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

96. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

97. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

98. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

99. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

100. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

101. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

102. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

103. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

104. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

105. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

106. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

107. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

108. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

109. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

110. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

111. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

112. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

113. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

114. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

115. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

116. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

117. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

118. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

119. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

120. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

121. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

122. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

123. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

124. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

125. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

126. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

127. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

128. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

129. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

130. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

131. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

132. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

133. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

134. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

135. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

136. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

137. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

138. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

139. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

140. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

141. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

142. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

143. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

144. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

145. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

146. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

147. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

148. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

149. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

150. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

151. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

152. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

153. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

154. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

155. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

156. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

157. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

158. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

159. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

160. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

161. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

162. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

163. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

164. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

165. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

166. If the engine fails to start, check that there is fuel in the tank, then start the engine again.

167. If the engine fails to start, check that there is fuel in the tank, then start the engine again.
