

Maker: Clarke

Model: XEP15H/50

Description: Air Compressor – 14CFM – 110v 32amp

This Compressor offers solid performance and reliability, plus the added convenience of being portable – ideal for industrial and commercial operators, garages, factories and farms too. This robust machine is protected by a steel frame to prevent accidental damage happening to the motor, compressor pump or switch gear. Capable of providing a more than adequate volume & pressure of compressed air to power professional spray-guns & many of the most frequently used air tools.

Please note: 32amp 10kVA Transformer fitted with 32amp Socket supply required.

Also do not use any Extension Leads.

SPECIFICATIONS

14cfm air displacement - twin cylinder aluminium compressor pump with after cooler

50 litre air receiver (CE certified)

3HP, 110V, 1ph motor with electrical overload protection

10.3bar (150psi) max. working pressure controlled by fully automatic pressure switch

Built to conform to all latest European standards

Dimensions (LxWxH): 1000 x 460 x 840mm

Weight: 72kg
