Specifications

Need a safe and reliable solution for those out-of-reach areas? Our 3-way combination ladder platforms are highly dependable and sturdy. These freestanding 3-way combination ladders for hire are available in a range of sizes so that your needs are met exactly.

Safety

Our 3-way combination ladders are designed for stability. Their wide, splayed bases and stabiliser bars prevent accidental slipping and wobbling. They use robust locking mechanisms to ensure the safety of both you and those around you. The rungs and feet are made of non-slip material to secure a grip on both your shoes and the ground.

Convenience

Although we rent out ladders that extend from 4.9m to 8.8m, these ladders are highly convenient in size for transportation. Their compact size means that they can easily fit into a van or garage. Made from aluminium, the 3-way combination ladder is incredibly lightweight and easy to carry, making your job easier.

This ladder is tested and approved to EN131 and has a maximum permissible load of 150kg.

Technical Data	CRL1	CRL2	CRL4	Rungs	Weight
