Description: Four Headed Flood Light c/w 6m Mast

SPECIFICATION

These four headed floodlight masts are temporary lighting solutions for commercial and industrial applications. Each of the four 500Watt heads use tungsten halogen lamps which give off a high-intensity light with a 60° coverage that will light up large, dark areas. The four headed floodlight mast comprising of a collapsible steel tripod base and lightweight aluminium four section masts extending to a height of 6 metres. The tripod features solid locking points to ensure the sturdiness when fully extended, and each leg has a ground fixing point so it can be secured. Also available with four 500Watt LED light Heads.
