

CAMON LA16

Lawn Aerator

LA16 Lawn Aerator

Engine: 5.5hp Honda GX160 petrol

Working Width: 16" (40cm)

Features & Benefits

The fantastic **CAMON** LA16 Lawn Aerator will guarantee maximum penetration in all ground conditions to allow air into compacted soil in grassed areas. Of extremely rugged construction, this superb machine is ideal for Autumn when the ground is best suited for aeration.

- Four totally independent tine drums allow for movement up, down and rotational, meaning that the Aerator will follow the curvature and undulations of the grassed area, thus guaranteeing even hole depths
- Wheel driven with the forward motion of the machine driving the tines (or corers) into the ground eliminating any possible damage caused by drains, paths etc
- Spring mounted tines ensure that there is no tearing of the ground, leaving very clean holes
- Solid tines as standard with hollow tines available as an optional extra
- Tough, rugged construction
