

Model: YGFPS Superglass

Description: Glass Fibre Platform Step Ladders

The Platform Steps are a robust, insulated and lightweight platform step ideal for use within the professional electrical trade and industry.

Certified to European Standard EN131: Professional, this step will safely support a maximum load of 150kg. Available in various sizes.

With a working platform size of 360mm x 300mm this step features non-conductive insulated glass fibre side rails, slip resistant feet and serrated aluminium treads for a firm foothold.

Approved to the latest EN131 Standard - For Professional Use.
