Product Description

The Superglas™ Reach-A-Light fibreglass combination ladder conforms with the new European EN131: Professional standard and offers a maximum load of 150kg.

The Superglas™ Reach-A-Light Ladder can be used in a number of different configurations including:

- A single section ladder

- **A double extension ladder**
- **A triple extension ladder**
- **A double sided ladder**
- **A free-standing ladder**

Designed for access where additional stabilising support is limited, the Clow Superglas Reach-A-Light Ladder is suitable for a wide range of outdoor and indoor uses.

The non-conducting properties of fibreglass make this ladder ideal for use within the electrical industry.

- **Insulated**
- **Lightweight**
- **Robust & durable**
- **Easily transported**
- **Safety rung locks**
- **Non-slip Feet**
