

Maker: Bluebird

Model: LSHE7000

Description: Electric Log Splitter - 240v 13amp

The Electric Log Splitter 7Ton is a powerful tool allowing to turn useful logs into usable firewood. It is compact in size allowing for easy storage and is simple and safe to use, with a two-handed operation. Logs are placed on the bed next to the anvil whilst the operator then activates the hydraulic ram to push the log which splits on the anvil's narrow leading edge. A useful collecting plate catches the logs after they are split. A very useful safety feature for this machine is the cage that sits around the ram and anvil. This prevents logs from jumping out at the operator during the splitting process.

SPECIFICATIONS

- Force: 7 Ton
- Power: 2200W / 230V
- Max Log Length: 520mm
- Max Log Diameter: 250mm
 - Weight: 59kg
- Dimensions: 114 x 42 x 65cm

Maximum Extension Lead 240v 13amp 2.5mm 10m – Must be fully unrolled
