

Prop Pal™

Needle System

Before it all comes crashing down...

The Professionals' Tool For Wall Support!
SAFE-EASY-SECURE

...use Prop Pal!

- Certified safe working load: Prop Pal MK3 1050kg
- CE mark and made from S275 Structural Steel
- Versatile: can be used as 'The Prop Pal Method' (with the jacking screw plate to support walls above floor chambers) OR as a standard needle
- Prop Pal MK3 includes attachable locating plates which fix to the base of the jacking screw plate, allowing props to lock securely at both ends for greater stability and giving an extra 100mm of space between props compared to earlier models of Prop Pal
- Slots through an aperture the size of a metric brick
- British invention – designed by a builder and made in the UK
- Free downloadable guidance on using Prop Pal at www.proppal.co.uk
- Prop Pal is the **ONLY** safe – easy – secure tool to support walls and will support your working life on site!
