

Model: Werner

Model: 8700 Series

Description: Telescopic Ladder 2.9m

Specification

The 2.9m Rung Space telescopic extension ladder is easily portable and has a closed length of 0.97m, extending to a length of 2.93m.

This adjustable ladder has smaller folded size than standard extension ladders which makes it easy to store, transport, and carry.

Other features include extra rung spacing to prevent finger trapping, single handed unlocking system for easy closure, and automatic locking system for security.

Approved to the latest EN131 standard - for Professional use.
